G

Notched Turned Back Nipples

Features:

- Stems are for use with lap joint flanges on page 714.
- When used with an appropriate notched ferrule, these fittings can be swaged or crimped onto hose providing improved shank retention.
- When used with double bolt or band clamps, notched turn back nipples provide shank retention similar to that of the King turned back nipples.
- The stem can be removed from a damaged hose by cutting away the ferrule without necessarily damaging the fitting. *After inspection to determine its suitability for reuse, it can be reinstalled into another hose by using a new ferrule.*

- Special pushers required: 1½" stem - RN150NOPUSH
2" stem - RN200NOPUSH
2½" stem - RN250NOPUSH
3" stem - RN300NOPUSH
4" stem - RN400NOPUSH

Dixon stems and ferrules are specifically designed to be used together as a coupling system. Due to differences in dimensions and tolerances for safety reasons, do not use other manufacturer's stems or ferrules with Dixon Holedall products.
