

PRB1250 -- Signal-Quick- Proximity Probes, 12mm x 50mm

Use Proximity Probes to monitor internal tooling components or for part detection. Reliable and versatile solid state output allows greater control.

Product Specifications

Product Type	 <p>Signal-Quick Sensor Mounting</p>
System Components	Proximity Probes
Size	M12x1x50mm
Housing Material	Heat Treated, Zinc Plated Steel
Jam Nuts	Zinc Plated Steel
Spring Rate	9 oz. (252 grams)
Max Allowable Force	250 lb-ft (2KN)
Probe Travel	Maximum: .076" (1.93) Activation varies by sensing range, Typically: .010" (.25) to .015" (.38)
Product Description	Signal-Quick is a full line of sensor mounting innovations designed to save design, manufacturing and maintenance costs. Industrial sensor mounts are costly and time consuming to fabricate. When subjected to harsh industrial environments, sensor mounts ca
